The RATCATCHER

THEATRICAL PERFORMANCE FOR ACTORS, MUSICIANS AND COILS

Our company is proud to present its new theatrical production for open air-locations and unconventional indoor spaces.

The RATCATCHER is available for international touring with our crew composed by 6 actors and musician departing from Bergamo province, Northern Italy.

The performance is inspired by the Pied Piper tale according to the Marina Cvetaeva poetical re-composition, so powerful and able to disclose the fundamental ideas connected in this legendary history, so far considered reality and fable at the same time.

The scenic concept of the performance develops around the theatrical use of big wooden coils, moved by the actors to create the different scenes and lead the audience into Hameln, town of the buttons and of the sober, buttoned up people... “Abel-Town, such a stable town” with all of us risking to be absorbed by its indifference, by its faith in the capital and diffidence toward the stranger. The actors work with masks integrating live music, realizing an extra-ordinary moment for any type of audience.

We warmly invite you to view the media link in this document and let us know if our show could fit in your cultural program!
