"The Ratcatcher" - technical rider

1. PERFORMANCE SPACE

- Minimum playing area: 9 × 9 m.
- Optimal dimensions: 13 × 13 m.
- The playing surface should be flat, stable and safe for performers.
- The audience area should be arranged according to the venue layout and agreed with the company in advance.

2. SOUND REQUIREMENTS

- A professional sound system suitable for the size of the audience and the performance space.
- A mixing console.
- A playback device.
- 5 wireless headset microphones.
- A sound technician available during setup, sound check and the performance.

3. LIGHTING REQUIREMENTS

- For performances in daylight, a lighting system is generally not required. For evening performances, appropriate stage lighting must be provided to ensure that the entire playing area is adequately illuminated. A lighting technician must be present.

4. DRESSING ROOM AND SECURITY

- The venue should provide a clean, covered and secure backstage or dressing-room space with a table, chairs, drinking water, and a suitable area for performers to prepare before the show.
- Two staff members must be present on site from two hours before the performance begins until the end of the performance.
- Secure parking near the performance location must be provided for the company van and trailer.
